

Dear FCC,

Please reject the NAB's petition 04-160. Satellite radio is something the public choose to listen to. We pay a fee to listen to commercial free music, news, and local weather and traffic. This is no different then the public paying for cable or satellite TV service. It should be our choice to pay for a better service. Please leave XM Radio the way it is and allow us the riche to choose what radio service we want to listen to.
